

## Analyzing a Class Report

**Directions:** You will need your Class Report to do this analysis. To

pull your Class Report:

1. Go to <https://teach.mapnwea.org>
2. Click on “View Reports”
3. Select “MAP Reports”
4. Select “Class Report”

**Compare your class mean and median to the *Normative Data* document.**

### RIT Score

My Class Mean	
My Class Median	
Normative Data Mean	

1. Is the mean or median for your class above or below the typical norm score for the grade level?

2. How might this impact Tier 1 instruction in your classroom?

3. Consider how well your grade-level textbook and materials match your students’ instructional readiness. Discuss your thoughts with a partner.

4. Have any of your students scored below the 10th percentile? How many? What instructional strategies will be most effective with these students?

5. Have any of your students scored at the 95th percentile or above? What instructional strategies will you use with these students?

## Goal Performance Areas

6. Which goal area has the highest standard deviation?
7. Which goal strands should be the focus for future instruction based on the quintile distribution?

**Directions:** Look at the mean score for each goal performance area.  
Answer the questions below:

1. Which goal areas have a mean 3 or more RIT points higher than the class overall mean?
2. Which goal areas have a mean 3 or more RIT points lower than the class overall mean?
3. How might this information help long-range planning?
