SRG Year 1

Course Description

Advanced American Literature is a yearlong investigation, beginning with a summer reading assignment, of our nation’s writings. This weighted course begins with the Native American oral tradition and continues through the Modern Era. Students explore a wide scope of literary movements, examining the historical and cultural impact American literature has made. Throughout this rigorous course, students hone their analytical thinking and writing skills, culminating in a written, formal researched argument. Because students entering this course will already have foundational skills in formal academic writing and rhetorical analysis, this course extends beyond the intensive study of American literature, and prepares students for the methods of thinking and styles of writing used in AP Language and AP Literature.

Standards-Referenced Grading Basics

The teacher designs instructional activities and assessments that grow and measure a student’s skills in the elements identified on our topic scales. Each scale features many such skills and knowledges, also called learning targets. These are noted on the scale below with letters (A, B, C) and occur at Levels 2 and 3 of the scale. In the grade book, a specific learning activity could be marked as being 3A, meaning that the task measured the A item at Level 3.

The common core state **standard** code is located on each scale.

The **Learning Goal** is the complete Level 3 of the scale.

Each lettered bullet point represents one **Learning Target**.

Scale Level Symbols	
▲	The targets on this level can be changed
🔒	Targets on this level can not be changed
+	More targets can be added to this level
✘	No targets are written at this level

The structure and design of the scale is common across SRG courses, even when specific design decisions, like unit-based courses vs. process-based courses, are in play. The scales are a critical part of the instructional routine in an SRG classroom.

The Body of Evidence in a Process-Based Course

Process-Based SRG is defined as an SRG course design where the same scale recurs throughout the course, but the level of complexity of text and intricacy of task increase over time.

This course does not have a traditional unit-based design. Instead, students cycle through the same basic topics repeatedly as they progress through the course, with the complexity of the text, analysis, and writing expectations increasing steadily throughout. To account for this, process-based courses like this have their evidence considered in a “Sliding Window” approach. When determining the topic score for any given grading topic, *the most recent evidence* determines the topic score. Teacher discretion remains a vital part of this determination, but it is hard to overlook evidence from the most recent (and therefore most rigorous) assessments.
